

I am writing in regards to NAB's petition 04-160. I want you to reject this petition. I am paying for a service that I want to have and use. The public radio broadcasters have know more right to stop XM from playing the traffic and weather on their system. Then ABC NBC or CBS has to stop CNN or MSNBC from telling me the news. The weather channel is on all different paid for cable companys. The local tv stations don't stop any of that from happing. So why would radio broadcasters be able to stop XM from doing it? I love XM radio. I spend many hours a day driving. It makes my day much better and gives me many choices to listen to. Thanks for your time. Michael Dodge
